

SOBERLINK

SL2 Cellular + GPS

SL2 is the first handheld remote breath alcohol device that features a cellular and GPS module in one single unit. This handheld technology captures in real-time the exact GPS location, BAC level, and confirmation photo of the client and wirelessly transmits the report to the SOBERLINK Monitoring Web Portal. The robust monitoring portal offers a variety of automated features such as automatic text reminders to clients when reports are due and instant alerts on client violations. Never before has remote alcohol monitoring been so easy and effective.

SL2 Features:

- Sleek, one-piece device
- Embedded GPS module
- Verizon cellular module
- Internal report queuing
- 3 day battery life (rechargeable)
- Professional fuel cell sensor
- Tamper proof features
- High resolution LED screen
- Instant report submission

SOBERLINK web portal features:

- Real time report includes client photo, BAC, GPS location
- Automated text reminders to clients when reports are due
- Automated alerts on client violations
- Report management options
